

CONTRACTORS LIST

There are two types of asbestos removal licence (unrestricted and restricted). Each licence is endorsed with several conditions that relate to the way asbestos removal work is carried out:

Unrestricted: An Unrestricted Asbestos Removal Licence allows the licence holder, or people employed by the licence holder, to remove all forms of asbestos (friable and non-friable). Friable asbestos means any material that contains asbestos and is in the form of a powder, or can be easily crumbled, pulverised or reduced to a powder by hand pressure when dry. Examples of friable asbestos include, but are not limited to, asbestos lagging, sprayed insulation, millboard, felt and woven asbestos matting; and

Restricted: A Restricted Asbestos Removal Licence allows the licence holder, or people employed by the licence holder, to remove amounts exceeding 10 square metres of bonded (non-friable) asbestos. Bonded asbestos contains material such as cement or rubber, which stabilises the product and gives it a non-friable structure. Common examples are asbestos cement sheets and pitch-based electrical switchboards.

UNRESTRICTED ASBESTOS LICENCE HOLDERS

Licensed to perform all unrestricted asbestos work in accordance with Part 5 of the *Occupational Safety and Health Regulations 1996*.

Please refer to the Licence holder to ensure they have met their legal obligation to have a competent person employed within the business, who has been validated and approved by WorkSafe prior to commencing any work under the licence.
